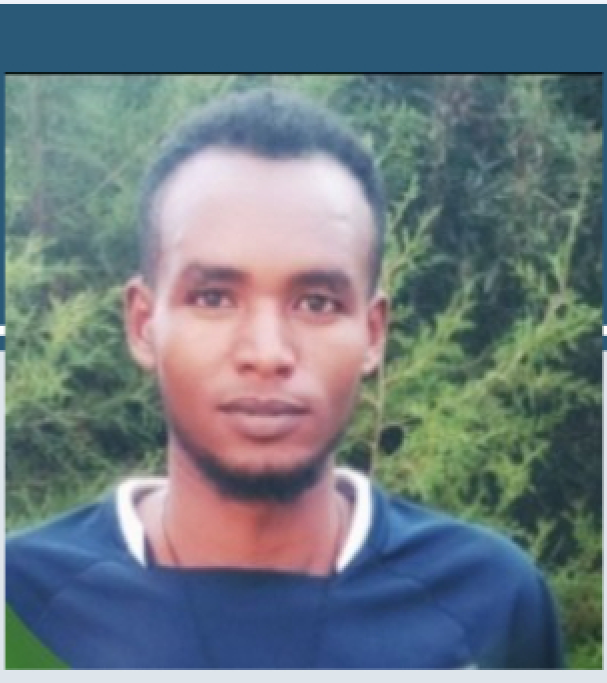
MELIS MELAKIE SHIFERAW



CONTACT

Debre Birhan
+251918498348
melismelakie27@gmail.com

SKILLS

- Python for data science
- R programming
- Mongo DB
- Data processing
- Data analytics
- Data validation
- Data visualisation and visualisation software
- Tableau proficiency
- Power BI and Matplotlib
- Machine learning
- Deep learning
- Predictive modelling
- Regression analysis
- Time-series analysis
- Data Modelling
- Natural language processing
- ETL and ELT processes
- Big Data analytics
- Advanced excel usage
- Data interpretation

LANGUAGES

First Language: amharic

English: B2
●●●●○○
Upper Intermediate

HOBBIES AND INTERESTS

- career interest:improving my technical and professional skills through academic projects, online training, certifications, practical experimentation and building data products that create real impact.

WEBSITES, PORTFOLIOS, PROFILES

- https://www.linkedin.com/in/melismelakie
- https://melismelakie.vercel.app

SUMMARY

Emerging data science professional transforming complex datasets into actionable insights through data preprocessing, model development, and validation. Build and test machine learning and deep learning models to support data-driven decisions. Communicate results using visual reports and interactive dashboards. Apply strong Python, scikit-learn, pandas, Tableau, MS Excel, and statistical analysis for accurate, practical outcomes.

EXPERIENCE

Data Science Intern, 06/2025 - 09/2025
Ethiopian Electricity Power - Addis Abeba

- Analysed large datasets using Python and R to identify trends, patterns, and insights for business decision-making.
- Pioneered the adoption of machine learning models to predict trends and patterns within datasets.
- Implemented data cleansing and preprocessing techniques, enhancing data quality for analysis projects.
- Demonstrated in-depth understanding of artificial intelligence technologies and methodologies, informing project strategies.
- Tailored data visualisation dashboards for different departmental needs, facilitating data-driven decisions.

EDUCATION

Bachelor of Science: Data Science, 2023 - Current
Debre Birhan University - Applied University
GPA: 3.3

A member of:

- Safaricom Talent Cloud Scholarship
- Huawei Talent Academy
- Demera/Percipio Academy
- Ethiopia Ethics and Anti-Corruption Commission

CERTIFICATIONS

- Africa's largest AI class,issued by NSK AI(July 13,2026)
- ML, Data Science & GenAI, issued by O'REILLY (Sep 02, 2025)
- Data Science & ML A to Z,issued by O'REILLY(Nov 23, 2025)
- AI Security & Ethics,issued by O'REILLY(Dec 05, 2025)
- Deep Learning with Python,issued by O'REILLY(Nov 02, 2025
- Job Roles in the Cloud ,issued by AWS(March 10, 2026)
- Digital Marketing Analytics,issued by O'REILLY(june 05, 2025)
- Search Engine Marketing, Inc.,issued by O'REILLY(july 25, 2025)
- Power BI Masterclass 2025,issued by O'REILLY(august 25, 2025)
- IMPROVING MACHINE LEARNING MODELS,issued by Demera/percipio(July 20, 2026)

PROJECTS

- Resiorver Water level predicting for Ethiopian hydropower plants
- Five Ethiopian Languages and English Bidirectional Translation
- Positive & Negative Sentiment Classification
- Real vs AI-Generated Human Image Detection
- Diabetes Prediction Using Machine Learning
- Weather Condition Analysis & Prediction

ACCOMPLISHMENTS AND AWARDS

- Data Analysis and EDA: Analyzed datasets using Python, Pandas, and NumPy to identify patterns, trends, and useful insights.
- Data Visualization and intractive dashboard: Created charts and graphs using Ms-excel, Tableau, Matplotlib and Seaborn to communicate data-driven findings clearly.
- Machine Learning and deep learning: Practiced building and evaluating machine and deep learning models .
- Data Cleaning and Preparation: Applied data preprocessing techniques to prepare datasets for analysis.
- Problem-Solving and Research: Applied analytical thinking and statistical methods to explore real-world problems and develop data-driven solutions.

CAREER GOALS

- professional goal:To become a Data Scientist and AI/ML professional who ships end-to-end ML systems from data collection to deployment and contribute to technology-driven solutions that address real-world challenges.
